

Odesa for Tic Tac Teo

Thanks to the simple game, boring lessons at school turned into a battleground of gambling students.

This entertainment was exciting for all 45 minutes. Nowadays, there is a modern analogue of the popular game, so to speak, a restyled version! Comfortable, large, voluminous tic-tac-toe can be placed on any surface!

The game is suitable for both children and adults. Well-known rules of the game - in turn, players place 3x3 marks on free cells of the field (one player plays crosses, the other - zeroes). The first to build 3 of his own pieces in a row horizontally, vertically, or diagonally, will win. The one who puts the crosses starts the game.

The technique you can use is not so important here. You can play fast, or think carefully about your every move - one will win, well, or no one!
